

Employer Health Screening Programme

The foundation of all health screening in the workplace, an exceptional Foundation Screen undertaken by one of our nurses in your workplace. This is by far the most widely utilised and cost effective screen of them all. This screen normally takes about 20 minutes and covers a range of important factors such as cardiovascular disease, diabetes and in addition includes the following:

- In Depth Medical Report
- Body Mass Index
- Waist to Hip Ratio
- Skeletal Muscle Assessment
- Metabolism Assessment
- Blood Pressure
- Body Fat Percentage Test
- Visceral Fat Test
- Peak Flow (Lung Function Test)
- COPD Test (Lung Age)
- Instant Cholesterol Test
- Heart Rhythm ECG Test
- Comprehensive Urinalysis inclusive of diabetes test
- Lifestyle Assessment
- Nutrition Assessment

***Additional tests that can be added on:**

- Prostate Cancer (PSA Male 40+)
- Thyroid Function (Female 40+)
- Full Pathology Profile
- Bowel Cancer Screen (Male/Female 40+)
- Free Radical Test
- *Additional Cost Applies

A urine sample and a finger prick sample of blood will be required. The additional tests requiring a blood sample and/or a stool sample (Bowel Cancer Screen) to be sent to our laboratory for analysis. All of your employees will have access to their own results securely on line with 'MAIA'.
