

Premier Executive Home or Office Health Screen

For the busy executive where it is too difficult to be away from the office we understand the constantly changing diary appointments and meetings. Reflect Screening Services are delighted to bring a Premier Health screen direct to your home carried out by one of our doctors. Although this health screen is predominantly for home, it can be easily tailored for the work place, providing the appropriate facilities are available.

With all the benefits of our Foundation Screen a physical examination by the doctor is included along with an Exercise (stress) ECG. Our doctors are trained and equipped to carry this test out in your home or office. This test is normally only available through a private or NHS hospital. After your stress test you can shower in the comfort of your own home or office.

You will have the doctors undivided attention with no distractions, the doctor will carry out the **ENTIRE** health screen including the taking of any samples.

With all the benefits of our Foundation Screen; but carried out by a doctor we include from a sample of blood:

- A full Pathology Profile taking an in-depth look at your liver and kidney functions and a range of over 20 other tests
- Thyroid Function test (Female 40+)
- Prostate Cancer test (PSA, Male 40+)
- Cholesterol looking at your good and bad cholesterol
- HPV Test (Female)

From a urine sample we will carry out:

- A urinalysis looking at bladder infections and any signs of blood in the urine
- A free radical test

Under exercise we will monitor your heart with an **Exercise ECG** sometimes known as a stress test.

With a faecal occult test, (Male/Female 40+) we can check for bowel cancer. A stool sample will need to be given to the doctor for our laboratory to analyse. We will send you a sample collection device direct to your home for this (you can opt out of this test if you wish).

With your consent the doctor will show you how to carry out a testicular self check or a breast self awareness check. Unfortunately cervical smears, HPV test and mammography* can only be carried out at a private hospital or health centre. We will handle all the arrangements for these appointments.

Please call Nick or Angie for further information and to arrange your health screens.
